About the Institute

Aaditya Group of Institutions plans and executes policy and development related matters of the institution by setting effective goals and participative process of decision-making. The same is very important not only to the fulfilment of the vision and mission of the Institute but also in building the institutional philosophy.

The Principal and the teaching staff play a crucial role in the planning and execution of its policies in academic and administrative activities.

The formal mechanism in the institution to consolidate the academic and administrative planning and implementation reflect back to achieving its vision.

The vision and mission of the institution:

VISION

To become the most sought- after name in the field of Nursing Education

MISSION

To educate student nurses with the academic standards in order to become health care leaders of the future

Aaditya group of institutions(AGOI), to provide invaluable education to aspiring nurses in order to become reliable members of the healthcare system and to effectively bridge the gap in the appalling nurse-patient ratio. The visionaries behind AGOI believe their responsibility to create a learning environment that enables students to achieve self-directed learning and develop a lifelong learning attitude.

With modern infrastructure, state- of-the-art facilities and experienced faculties, AGOI aims to foster sense of confidence alongwith much needed clinical skills, supported by a strong foundation of theoretical knowledge, in its students in order to make them invaluable members of the healthcare industry.

Message from the Director

Mr. Anil Kumar
(Owner/Director)

Education is not just about collecting information; It is the preparation for life. Education is knowledge bound by wisdom and ethics. It develops students' personalities moulds their character and develops mental skills to help them deal with the problems and challenges of today's complex world. One of the most important character traits in our youth during education that needs to be inculcated is a subtle inclusive attitude about service-before-self. The goal is not only to make them successful in life, but also to make them aware of their duties and responsibilities towards their colleagues. It is with his vision that the Aaditya group of institutions was established. Our institute is for students who believe that education must address these imperatives, while preserving essential values from the past. We prepare our students for both academic and social challenges. I warmly welcome you to "Aaditya group of institutions" where your dreams will come true.

Message from the Principal

Nursing, like medicine, is a noble profession. Out of all the professionals working in a healthcare setting, the nurse happens to have the most direct and prolonged interaction with the patient. Nurses are responsible for the day-to-day care of patients. The most important goal of nursing education at present is to prepare students to meet the needs of the times. The current healthcare industry is dealing with a chronic dearth of nurses, which has been exacerbated by the pandemic. Our endeavor is to encourage every student to realize their true potential by adopting a practical and scientific approach to learning. All the rote learning in the world will fail when faced with a real-life medical emergency.

Thus, We offer nursing students a means of gaining practical experience which is far more valuable professionally than any lecture or textbook. Our goal is to provide the best nursing professional education, train qualified nurses who understand the current complexities of human health management as well as preventive, promotional and rehabilitation healthcare. I look forward to seeing AGOI students achieve all their dreams.

Mrs. Suman Lata

NURSING

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses develop a plan of care, working collaboratively with physicians, therapists, the patient, the patient's family, and other team members that focus on treating illness to improve quality of life. Nurses may help coordinate the patient care performed by other members of a multidisciplinary health care team such as therapists, medical practitioners, and dietitians. Nurses provide care both interdependently, for example, with physicians, and independently as nursing professionals.

Sr. no	Courses	Course	Duration	Eligibility
1	ANM	Auxillary Nursing Midwifery	2 Year	12 th any stream
2	GNM	General Nursing Midwifery	3Year	12 th any stream
